PROFESSIONAL SUMMARY

Frontend developer with around 5+ years of experience working on responsive web applications and dashboards using React.js and modern JavaScript. I mainly work on building reusable UI components, improving performance, and translating Figma designs into clean, production-ready interfaces. Comfortable working closely with backend teams and shipping features in fast-paced environments.

SKILLS

Languages & Technologies

JavaScript (ES6+), ReactJS, jQuery, HTML5, CSS3, SASS

Frameworks & Libraries

Tailwind CSS, Bootstrap, Material-UI, Chart.js, Redux, Formik, Redux Toolkit, React Query.

Tools:

Figma, Adobe XD, Canva, Git, GitHub, VS Code, Postman, Chrome DevTools, Jira

Build Tools:

Vite, Webpack, Babel, NPM, Yarn

WORK EXPERIENCE

SingleInterface — Frontend Developer (2023 – Present)

- Working on enterprise dashboards and internal tools using React.js and Tailwind
- Improved performance by cleaning unused packages and optimizing rendering
- Integrated APIs and handled data-heavy UI screens

Infinity Soft Systems — Software Engineer (Jan 2023 – Mar 2023)

- Developed responsive UI screens using React and JavaScript
- Created reusable components and handled API integration
- Worked on improving UI consistency and user experience

Meritto (NoPaperForms) — Developer (2020 – 2022)

- Built SEO-friendly landing pages and marketing screens
- Converted Figma designs into responsive layouts
- Optimized images and loading to improve performance
- Delivered mobile-first UI for multiple campaigns

PROJECTS

Gemini Clone - [Link](#)

A frontend clone of Google's Gemini UI.
