

AAKASH KASTURIYA

React.js Developer | MERN Stack | Generative AI Integration

Delhi, India | aakashkasturiya@gmail.com | +91 8860472766

github.com/AakashKasturiya | linkedin.com/in/aakash-kasturiya | aakashkasturiya.netlify.app

PROFESSIONAL SUMMARY

React.js Developer with 5+ years of experience building high-performance, scalable web applications using React.js, React Hooks, TypeScript and Redux Toolkit, backend by MERN stack skills in Node.js, Express.js and MongoDB. Experienced in designing REST APIs, JWT authentication and RBAC, and in integrating Generative AI (OpenAI, Gemini) into real products, including LLM-powered recommendations, conversational assistants and voice interfaces. Strong in reusable component libraries, Core Web Vitals and performance optimization, accessibility and Agile delivery. Seeking a React / Full Stack role building AI-enabled products.

TECHNICAL SKILLS

Frontend: React.js, React Hooks, Context API, TypeScript, JavaScript (ES6+), Redux Toolkit, React Query, Axios, React Router, Tailwind CSS, HTML5, CSS3, SCSS, Responsive Design, Cross-Browser Compatibility, Accessibility (WCAG, ARIA), Component-Driven Development

Backend: Node.js, Express.js, MongoDB, Mongoose, REST API Design, JWT Authentication, Role-Based Access Control

Generative AI: OpenAI API, Gemini API, LLM Integration, Prompt Engineering, Conversational AI, AI Recommendations, Streaming Responses, Voice/Audio AI, Web Speech API

Performance & Testing: Core Web Vitals, Lighthouse, Code Splitting, Lazy Loading, Memoization, Jest, React Testing Library, Unit & Integration Testing

Tools & Practices: Git, GitHub, Code Reviews, Agile/Scrum, Postman, Vite, Jira, Vercel, Figma, Adobe XD

PROFESSIONAL EXPERIENCE

Frontend Developer (React.js) | SingleInterface

Jun 2023 – Aug 2026

- Architected and shipped scalable React.js and TypeScript dashboards and a reusable component library used across multiple enterprise applications, reducing duplicate UI code and speeding up feature delivery.
- Built an internal full-stack Email Sender platform end to end using React, Node.js, Express.js and MongoDB, owning the UI, REST API design and Mongoose data modeling.
- Integrated REST APIs using Axios and React Query (caching, background refetching, pagination), improving data-fetching efficiency and perceived performance.
- Improved Core Web Vitals and responsiveness through React.memo/useMemo, code splitting, lazy loading and component refactoring; audited performance with Lighthouse.
- Managed application state with React Hooks, Context API and Redux Toolkit across complex dashboard workflows.
- Accelerated UI prototyping with AI-assisted tools (Base44, Readdy), cutting time from concept to working interface.
- Worked in Agile/Scrum sprints with designers, QA and backend teams, using Jira, Git workflows and peer code reviews.

Software Engineer (React.js) | Infinity Soft Systems

Jan 2023 – Mar 2023

- Developed responsive, cross-browser web interfaces using React.js, JavaScript, HTML5 and CSS3.
- Built reusable React components with Hooks and integrated REST APIs into production frontend applications.
- Created responsive HTML/CSS email templates tested for compatibility across major email clients.

Frontend Developer | Meritto (NoPaperForms)

Sep 2020 – Dec 2022

- Developed responsive, SEO-friendly, accessible web interfaces for EdTech products serving institutions and students.
- Converted Figma and Adobe XD designs into pixel-accurate, production-ready interfaces.
- Built reusable UI components with cross-browser and responsive compatibility.
- Collaborated with designers and development teams in Agile sprints to deliver product features on schedule.

AI & FULL STACK PROJECTS

AI-Powered E-Commerce Platform

React.js, Node.js, Express.js, MongoDB, OpenAI API

Live: ai-driven-mern-e-commerce.vercel.app | GitHub: [Al-Driven-MERN-E-Commerce](https://github.com/Al-Driven-MERN-E-Commerce)

- Built a full-stack MERN e-commerce app with an OpenAI-powered AI Stylist and personalized product recommendations integrated into the core shopping flow.
- Designed backend REST APIs with JWT authentication for the product catalog, cart, wishlist, checkout and order management.
- Developed an admin dashboard with role-based access control (RBAC) for managing products and orders.

Ishara AI – Voice-Powered AI Assistant

React.js, Gemini API, Tailwind CSS, Web Speech API

Live: ishara-ai-voice-assistant.vercel.app | GitHub: [ishara-ai-voice-assistant](https://github.com/ishara-ai-voice-assistant)

- Built a conversational LLM assistant on the Gemini API with chat history and context retention for multi-turn interactions.
- Implemented voice input and text-to-speech with the Web Speech API, plus voice-based website commands and content filtering.
- Designed a responsive, modern dark-mode interface with Tailwind CSS and reusable React Hooks-based components.

EDUCATION

Master of Computer Applications (MCA) | GGSIPU, Delhi

2017 – 2020

Bachelor of Computer Applications (BCA) | CCSU

2013 – 2016

CERTIFICATIONS

- Introduction to Generative AI (Simplilearn)
- Introduction to MERN Stack (Simplilearn)
- React – The Complete Guide (Udemy)
- Responsive Web Development with HTML/CSS (Udemy)
