PROFESSIONAL SUMMARY

Frontend Developer with 5+ years of experience building scalable enterprise products and dashboards using **React.js, JavaScript, TypeScript, Redux Toolkit, React Query**, and modern frontend technologies. Experienced in reusable component architecture, REST API integration, authentication, RBAC, and frontend performance optimization. Hands-on experience with **Node.js, Express.js, MongoDB, JWT, and MERN stack development**, along with **AI-powered application development** and AI-assisted development tools.

SKILLS

Frontend & Languages: JavaScript (ES6+), TypeScript, React.js, jQuery, HTML5, CSS3, SASS, Redux Toolkit, React Query, React Router, Formik, Tailwind CSS, Bootstrap, Material UI, chart.js, Jest, RTL, Unit & Integration Testing

Backend & Database: Node.js, Express.js, REST APIs, API Integration, JWT Authentication, RBAC, MongoDB, MongoDB Atlas, Mongoose

AI, Tools & Development: OpenAI API, Gemini API, ChatGPT, Claude, GitHub Copilot, Base44, Readdy, Devin, Figma, Adobe XD, Git, GitHub, VS Code, Postman, Vite, Webpack, Babel, NPM, Chrome DevTools, Jira

WORK EXPERIENCE

SingleInterface — Frontend Developer (2023 – Present)

- Leveraged AI-powered design and development tools such as Base44 and Readdy to accelerate UI prototyping and frontend development.
- Developed scalable enterprise dashboard modules using React.js and modern JavaScript.
- Built an internal Email Sender platform for the Marketing team using the MERN stack (React.js, Node.js, Express.js, and MongoDB).
- Integrated REST APIs and managed server state using React Query for efficient data fetching .
- Optimized application performance by reducing unnecessary re-renders, removing unused dependencies, and improving bundle efficiency.
- Collaborated closely with Product, Design, Backend, and QA teams to deliver production-ready features and improve internal business workflows.

Infinity Soft Systems — Software Engineer (Jan 2023 – Mar 2023)

- Developed responsive web interfaces using React.js and JavaScript.
- Created reusable frontend components to accelerate feature development.
- Integrated REST APIs with frontend modules.

- Developed responsive HTML/CSS email templates compatible with major email clients for marketing and business communication campaigns.

Meritto (NoPaperForms) — Developer (2020 – 2022)

- Contributed to the development and frontend implementation of **EdTech products and digital platforms** using modern web technologies.
- Built SEO-friendly landing pages and marketing interfaces for **leading colleges and universities**, supporting student acquisition and enrollment campaigns.
- Converted Figma and Adobe XD designs into pixel-perfect and production-ready interfaces.
- Ensured cross-browser compatibility and mobile responsiveness across devices.
- Collaborated with designers, product teams, backend developers, and QA teams to deliver high-quality frontend features and product experiences.

PROJECTS

AI-Powered E-Commerce Platform

Tech Stack: React.js, Node.js, Express.js, MongoDB, OpenAI

Developed an AI-powered e-commerce platform featuring personalized AI Stylist and product recommendation capabilities, built on a scalable MERN architecture with secure authentication, product catalog, cart, wishlist, checkout, order management, and role-based admin dashboard.

Live Demo: <https://ai-driven-mern-e-commerce.vercel.app/>

GitHub: <https://github.com/AakashKasturiya/AI-Driven-MERN-E-Commerce>

Ishara AI – Voice-Powered AI Assistant

Tech Stack: React.js, Gemini AI API, JavaScript, Tailwind CSS, Web Speech API

Developed a voice-powered AI assistant featuring intelligent Gemini AI conversations, voice input and text-to-speech responses, voice-based website commands, content filtering, chat history, & a responsive dark-themed UI.

Live Demo: <https://ishara-ai-voice-assistant.vercel.app/>
